

## Electrical Parts for Forklifts

Forklift Electrical Parts - Lift trucks may be specifically labeled to be utilized in hazardous sites. A labeled forklift denotes the design has met the minimum requirements of ANSI/UL 558 utilized for engine powered forklifts or ANSI/UL 583 for electric trucks for the type of label placed.

The use for labels used for lift trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Maintenance and Operation, Type Designations, and Areas of Use. Consult your local insurance provider and Fire Marshall for additional information regarding the approved uses of industrial powered forklifts in your application.

If the specific forklift meets the outlined standards, labels could be put. A labeled lift truck would show the type of designation placed on the nameplate and would have a correctly corresponding label attached.
