

Aerial Work Platforms

Aerial Work Platforms - There are a lot of accessories meant for forklifts that can be used in order to help expand the functionality of your lift truck and allow you to carry things, handle materials with less effort or to finish clean-up tasks.

Many of the attachments are specifically designed so as to fit on the blades themselves. Fork extensions for example, are utilized if you require much more blade length, that increases lifting capacity. Blade extensions come in lengths varying from forty eight to one hundred twenty inches. Rounded or triangular attachments are another type utilized whenever moving rolled material to be able to make sure it does not roll off of the standard flat forks.

Lifting accessories can be pivoting and telescoping crane attachments. They are available in numerous kinds. These attachments are usually utilized for transporting lumber, metal bars, poles or whatever kind of bulky items. Additional attachments like for example other kinds of hooks and hook plates are existing to be able to carry objects with a chain or sling. Magnetic lifters and slab lifters are other items which could be used with hook attachments. Slab lifters are specialized accessories that are intended for picking up different materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which attach to your forklift to be able to make transporting rolls of carpet a lot easier. The attachment hooks onto the forklift's forks and has a pole which goes through the center of the carpet roll.

There are many different types of forklift attachments that could be intended for facility maintenance like snow blades. These blades attach to front end loaders and can transport materials like for example dirt, soil and snow. Other common cleanup accessories include standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the lift truck blades connect onto for sweeping big spaces such as parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in places where there is lots of metal debris such as on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up simple and fast.

A material spreader is one more lift truck accessory which is usually used at facilities. These spreaders are useful for a variety of applications like spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Work platforms are another optional lifting attachment that lots of companies make use of day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are several units accessible which are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location making use of the lift truck. Larger platform models have extra space for personnel to be able to carry tools and other necessary objects meant for the task. Usually work platforms are constructed of steel or ploy material.
