

Clark Forklift Parts

Clark Forklift Parts - Performing globally, there are currently 350,000 Clark forklifts and lift trucks in operation, with in excess of 250,000 of those operating in North America. Clark has five major lines of lift trucks across the world, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 distinctive designs of forklifts, with parts covering more than 120,000 specific components for all of its automated equipment. Your regional Clark Seller is your complete source for availability of all your components needs supplied by Clark Totalift.

Clark's extraordinary Parts Distribution Centers are conveniently stationed in Louisville, Kentucky, which serves both their consumers and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Motivated to offer the highest level of value and service to our clients, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Internationally, Clark has one of the most outstanding dealer support networks. With over 550 locations worldwide, seller representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the material handling market.

Clark proudly remains an innovative leader of the material handling industry, revolutionizing safety features such as the worker restraint system. This exceptional dedication to safety is currently a customary feature on every forklift.

Clark's relentless effort to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck producer across the world to be certified with the internationally approved quality standard ISO 9001 for each and every one of their manufacturing plants. Additionally, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any number of environmental limitations, thus placing them in a dominant market position.

Clark has preferred the particularly economical and advantageous structure of "Lean Production" for its assembly plants and application of resources. This structure was established to acknowledge the most successful method of production plant stewardship and ensuring maximum proficiency. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

By working together, Clark's product suppliers and engineers communicate towards enhancing product proficiency while minimizing costs. The new value engineering agenda combines innovative product growth and offers superior customer support and service within the industry.
