

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country trip in their RV. Recently retired, after spending many years working with his brother to build their crane company into an market leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road expedition.

While on their journey, John spent time conversing with previous business associates whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a considerable market for a product that could swiftly and safely lift individuals in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a partnership with two friends and acquired a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they designed and sold the first JLG aerial work platform. The company incorporates many of the simple design elements of that original lift into current designs.

JLG lift trucks have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the company proudly continues to expand itself into numerous marketplaces globally and develops new products to make certain customers are capable of being more efficient and perform in the workplace within a safer atmosphere.
