

Side Tilt Carriages

Side Tilt Carriage - There are actually 4 sizes of hook type blade carriages rated by the tine carriage hoisting capability. Hook type tine carriages have been uniform.

Class I carriages are rated for loads up to 2000 lbs. The carriage bar spacing utilized for Class I is 13 inches. Class II carriages are rated for cargo as much as 5,550 lbs. Their carriage bar spacing is sixteen inches. Class III carriages are rated for cargo as much as 10,000 lbs. The carriage bar spacing for this particular class is twenty inches. Class IV carriages are rated for cargo as much as 15,500 lbs. The carriage bar spacing used for this capacity is twenty five inches.

The carriages for pin type tines could be different depending on the maker. Pin mounted blades could differ by the amount of offset between the blade eye and the tine. Carriage capacity would be established by the carriage pin size and by the blade size.
